

SchoolTribe

Extracurricular enrichment for students in Kinder-12th grade

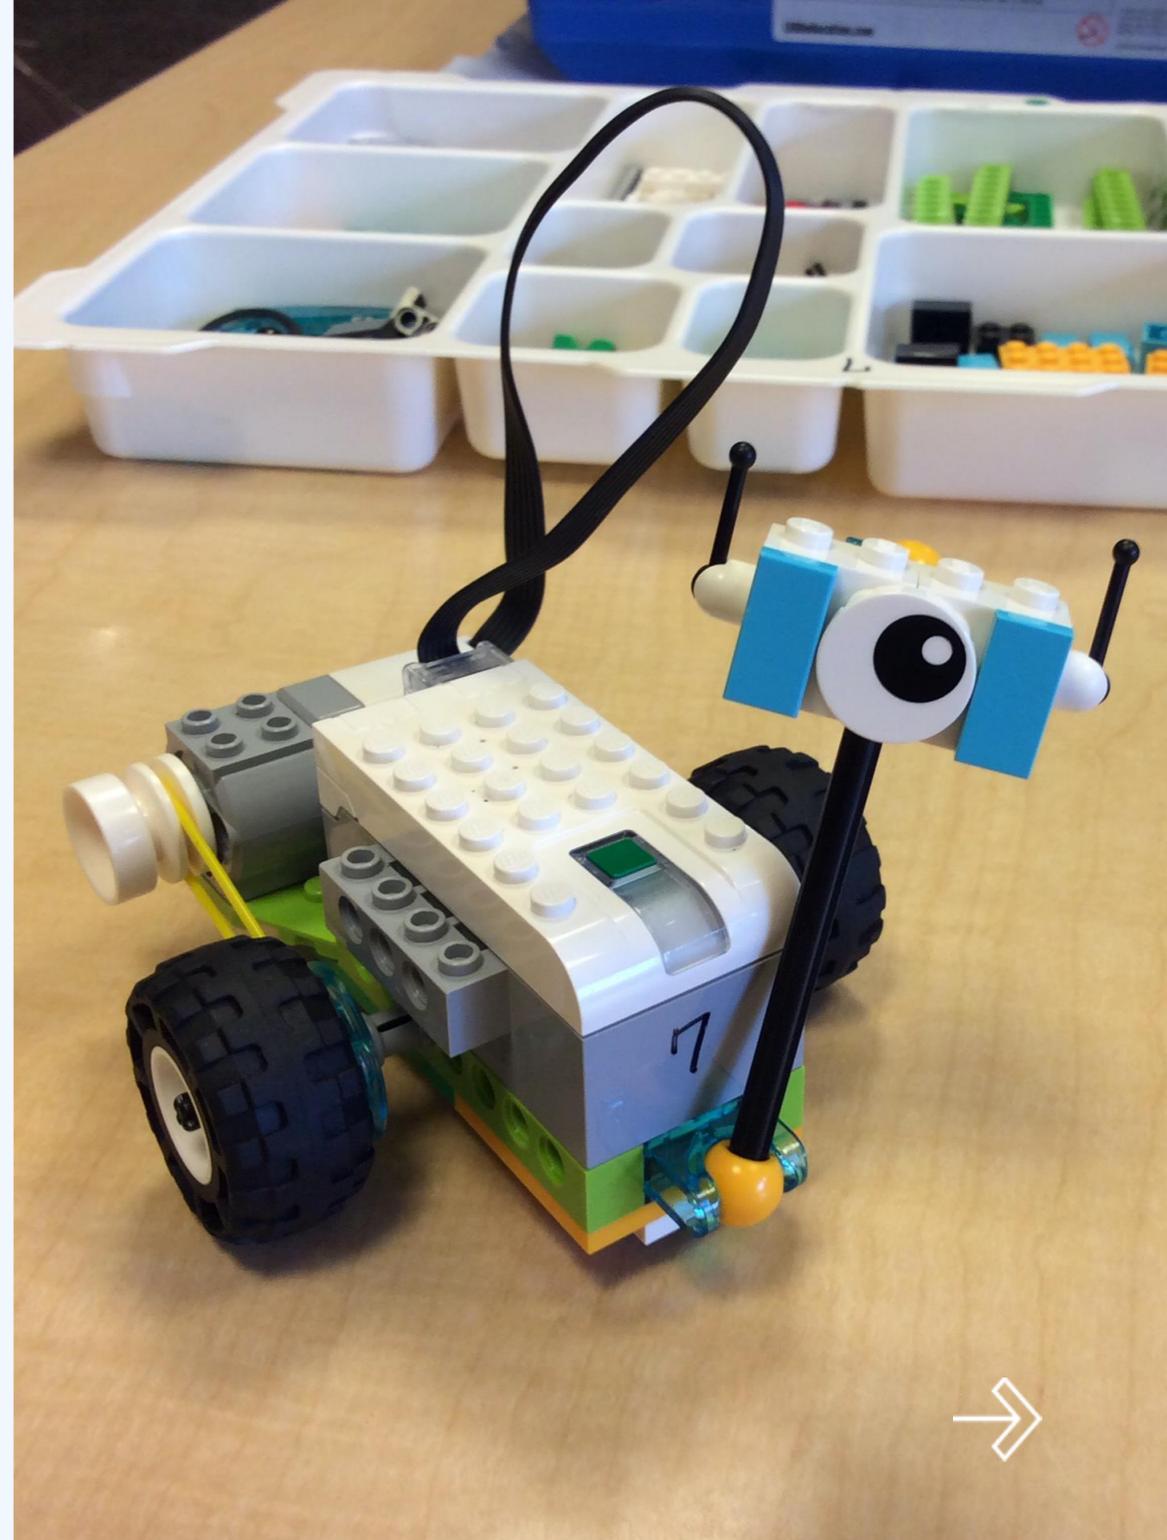

Welcome!

Thank you for considering SchoolTribe as a provider of extracurricular enrichment for your student. We've partnered with numerous international schools to increase their offerings and we look forward to serving your community as well. We strongly believe in SchoolTribe's proven methodology, which is backed by substantial experience and a strong passion for developing children's classes.

SchoolTribe is on a mission to make after-school educational opportunities accessible, affordable, and of the highest quality. We accomplish this by combining creativity with problem solving in all of our activities. Our teachers spend hours researching and creating the best project-based classes for our tribe of learners. We partner with developers of educational materials such as LEGO®, Sphero, Little Bitts, Strawbees, and more to bring the best opportunities to our students through educational play.

Creativity and problem solving is at the core of all our learning clubs, and our students love to come to class and explore their individual interests through our various offerings. At SchoolTribe, we emphasize student interaction and collaborative problem solving, both in-person and online. We are proud to give our students the opportunity to learn alongside their peers in a diverse international setting.

Contact us today and learn how we can be an asset to your student or your school!

SCHOOLTRIBE PARTNERS WITH SCHOOLS TO OFFER OFFER INDIVIDUALIZED COURSES.

We strive to create a learning environment where children can fully express themselves and collaborate with each other while developing creativity and problem solving skills.

On Campus Enrichment Clubs

STEAM CLUB: Fun and engaging project-based activities centered around the themes of Science, Technology, Engineering, Arts, and Math.

TECH & CODING CLUB: This class offers youngsters the opportunity to learn about coding, robotics, engineering, game development, animation, and digital arts using a combination of educational materials.

SCIENCE CLUB: Championship science fair projects fill the hour in this fun and exciting class. Make an exploding volcano or learn how to write a secret message with invisible ink.

ART CLUB: From ancient art to modernism, your child will have access to a wide range of materials and learn new techniques while developing a love of art.

TAILOR-MADE PROGRAMS DEVELOPED TO FIT THE NEEDS OF EACH SCHOOL

We work closely with schools and institutions to create innovative classes that fit their calendar and educational philosophy.

COOKING CLUB: In this cooking and food preparation class, children will visit the cultures and cuisines of the world and learn to appreciate their diverse customs, cultures, and foods.

DRAMA CLUB: Self-esteem, confidence, creative thinking, acting, public speaking, as well as leadership and teamwork skills flourish in this fun and dynamic class.

TYPES OF CLASSES

In-person classes are held at various international schools. SchoolTribe works with institutions to develop and implement clubs in accordance with the school's calendar and for the convenience of the parents.

Online Zoom classes make learning accessible to all. Classes offer the benefits of in-person learning from the comfort of home. Students receive weekly "activity kits" at home to complete during online learning.

Schedule

SchoolTribe brings the teachers and materials to your school and adapts each course to fit the calendar, timetable, and educational philosophy of each institution.

Safety

Parents can rest assured that each individual teacher is carefully vetted and background checked before allowing them to join our team of educators. We also ensure they are experienced in developing fun and educational experiences in a classroom setting.

Materials

SchoolTribe has partnered with educational manufacturers to provide its students with the best materials to learn with. Our partners include LEGO®, Sphero, Little Bitts, STRAWBES, MakeDo!, and more.

WHY PARTNER WITH US

Increase your institutions extracurricular offerings through tailor-made classes.

Give your institution a competitive edge. We only partner with the best schools.

Convenient extended school hours for busy and working parents.

Added revenue stream for your school under different payment models.

We provide the teachers, curriculum, and materials for all our classes.

Give your students access to the most up-to-date educational materials through our extensive list of partners.

About Us

SchoolTribe develops and teaches high quality extra-curricular classes at various international schools in Tokyo. Our online platform was created during 2020 in response to the cancellation of in-person extra-curricular classes due to COVID-19. The pandemic prompted a quick response and understanding of the possible long-term impacts of the situation. As a result, SchoolTribe adapted and developed our offerings to meet students where they were at.

Both during that time and after, we've notice that parents are scrambling to find quality extracurricular activities in a variety of subjects, both on campus and online. We've grown to meet parents needs and we look forward to continuing to grow alongside the many students we nurture in our classes. We hope to continue sharing our offerings with a wider community, spreading our passion for education with students all over the world.

Thank you for being part of SchoolTribe.
